FACING THE CHALLENGE

At an early age, she had a small boil on her left nostril, which kept on growing and eating away a third of face. Born in a poor family of totally 10 Members with a meager income of Rs. 1,000 (< 15 US \$) per month, visiting a distant City for Medical Help / Treatment was beyond means and imaginations. Studied up to 9th std., but gave up studies due to facial disfigurement and being an object for comments to most of her friends. She is undergoing rounds of Reconstructive Surgeries, no wonder, would look like most of us, to make her socially acceptable as well to boost confidence and Self- esteem.

THE VICTIMS OF BHUJ EARTH QUAKE

Severe Crush Injury of the leg leading to an inevitable amputation. After repeated wound debridement and care, the leg has been saved with a micro vascular Surgery.

Voluntary Specialized Surgery using Reconstructive Microsurgery to salvage the leg from impending Gangrene / Amputation and making the Survivor walk on her feet.
